Our Mission

Today dry cleaners expect a system to help manage all aspects of their business. From simple tasks to sophisticated reports, a system has to do many things. At the same time advancements in computers and the Internet are transforming the way dry cleaners do business. Our company mission is dedicated to developing products that help dry cleaners now and in the future. It helps maintain tight controls on business and is ready for the information challenges of tomorrow.

Discover Our Innovative Dry Cleaning POS Touch Screen System

Fabricare Manager provides an optimal combination of logic and sophistication. Users appreciate the large buttons and uncluttered menus that promote accuracy and efficiency. Functions, like pricing and cashing out, can be completed in seconds, as clerks adapt quickly to the minimal number of transaction steps.

Centralized data statistics provide instant insight into processing quality, employee productivity, and marketing results. More than 75 different management reports can be accessed and printed with Fabricare Manager's Report Viewer

Customer Management

Fabricare Manager enables you to create statements or commercial invoices with as little as three button presses. Mail merge, address labels and customer loyalty comes as standard features. Fabricaremanager integrates easily with Word®, Excel® and other MS Office™ products.

Quickly set up queries to retrieve data for mailing lists, merge printed letters, mailing labels, postcards, etc. Design your own letters, labels and even reports all within Word® or any other word processor.

Setup price lists to be simple or complex based on your needs. Define Service Departments, Categories, Garments, Upcharge Groups, Merchandise, Service fees, Coupons and Discounts. Give customers or employees automatic discounts. Create automatic discounts triggered by services selected. Advanced Price List maintenance features include the ability to copy entire price lists for an individual customer or group of customers saving you hours of manual entry work.

Further, perform price increases and decreases automatically for any price list, service department or category. You may Increase or decrease prices by amount or percentage with optional rounding to the nearest cent.

Touch screen

Our system was designed for, and around touch screens. A Touch screen is affordable and cuts training time. We have large buttons displaying only what is necessary during each step. New users are pulled through their work in a consistent fashion guaranteeing accuracy. Beyond the normal functions of drop-off, invoicing and pick-up, Fabricare Manager is also a state-of-the-art client/server system that can authorize credit cards, print tags, perma-fiber tags as well as crunch customer, inventory and sales

Complete Valet handling

Assign price lists to valet customers such as hotels, restaurants or other business customers. Features optional input of: guest names, hotel room and invoice reference. It Prints specialized invoices, delivery lists and account statements showing guest

Printing

We are passionate about things that work. So when it comes to printing we use only the leading brand with a proven track record. The printers are known to deliver accurate copies of tags and receipts every time. With new technology in the printer arena, we are able to deliver fast, quiet printing of invoices, tags, receipts and small reports. Forms include work orders, invoices, fetch slips, sales receipts and credit card agreement receipts

Fabricare Manager Reports

Management Reports can be viewed and printed using our custom Report Viewer. Quickly jump to pages within the report using our table of Contents Index feature or use the find button to search for anything within the report, Print reports to Laser printers, Desk jet printers or any printer supported by Windows®. Output reports in popular formats such as HTML, Excel, rich text files (Word) or Acrobat Reader® PDF files.
