## Our Process

1. Select pre-printed barcode label
2. Locate suitable location on garment for label
3. Using a heat seal press permanently attached label to garment
4. Scan label with the handheld barcode scanner and link the garment to an employee
5. Using the FMS system to generate reports on garment status and clean frequency

*“Since we installed Fabricare Manager Garment over a year ago, we haven’t lost or misplaced a single garment.”*

Uniform Manager Carol Hegarty, The Merrion Hotel Dublin

### Our Mission

Today drycleaners expect a system to help manage all aspects of their business. From simple tasks to sophisticated reports, a system has to do many things. At the same time advancements in computers and the Internet are transforming the way drycleaners do business. Our company mission is dedicated to developing products that help drycleaners now and in the future. It helps maintain tight controls on business and is ready for the information challenges of tomorrow.

### Garment Tracking Never Lose a Piece

The labels we use are developed to easily handle the repetitive cleaning processes of laundry and dry cleaning without the risk of degrading the printed barcode. This is true whenever you choose a pre-printed or print-on-demand solution.

### Pre-printed Labels

We supply solutions for garment identification through both pre-printed labels and on-demand label printing systems. Pre-printed labels are the simplest, most cost-effective way of automating your garment identification system. Printing on-demand using our label

printing systems gives you total flexibility. The pop up press ensures the secure identification of textiles and garments. It's simple to operate, and once the garment ID label is applied, it won't come off.

### Customer Management

Fabricare Manager enables you to create statements or commercial invoices with as little as three button presses. Mail merge, address labels and customer loyalty comes as standard features. Fabricaremanager integrates easily with Word®, Excel® and other MS Office™ products. Quickly set up queries to retrieve data for mailing lists, merge printed letters, mailing labels, postcards, etc. Design your own letters, labels and even reports all within Word® or any other word processor.

Setup price lists to be simple or complex based on your needs. Define Service Departments, Categories, Garments, Upcharge Groups, Merchandise, Service fees, Coupons and Discounts. Give customers or employees automatic discounts. Create automatic discounts triggered by services selected. Advanced Price List maintenance features include the ability to copy entire price lists for an individual customer or group of customers saving you hours of manual entry work.

Further, perform price increases and decreases automatically for any price list, service department or category. You may increase or decrease prices by amount or percentage with optional rounding to the nearest cent.

### Touch screen

Our system was designed for, and around touch screens. A Touch screen is affordable and cuts training time. We have large buttons displaying only what is necessary during each step. New users are pulled through their work in a consistent fashion guaranteeing accuracy. Beyond the normal functions of drop-off, invoicing and pick-up, Fabricare Manager is also a state-of-the-art client/server system that can authorize credit cards, print tags, perma-fiber tags as well as crunch customer, inventory and sales statistics.

### Complete Valet Handling

Assign price lists to valet customers such as hotels, restaurants or other business customers. Features optional input of guest names, hotel room and invoice reference. It prints specialized invoices, delivery lists and account statements showing guest information.

### Printing

We are passionate about things that work. So when it comes to printing we use only the leading brand with a proven track record. The printers are known to deliver accurate copies of tags and receipts every time. With new technology in the printer arena, we are able to deliver fast, quiet printing of invoices, tags, receipts and small reports. Forms include work orders, invoices, fetch slips, sales receipts and credit card agreement receipts.

### Fabricare Manager Reports

Management Reports can be viewed and printed using our custom Report Viewer. Quickly jump to pages within the report using our Table of Contents Index feature or use the find button to search for anything within the report. Print reports to Laser printers, Desk jet printers or any printer supported by Windows®. Output reports in popular formats such as HTML, Excel, rich text files (Word) or Acrobat Reader® PDF files.
